MEET ASSART

The foundation on which we'll build a highly flexible Moodle or Totara site that's tailored to your organisation.

Spark configures every aspect of design, user experience, functionality, usability and content for your learning platform. It makes it easy to create incredible, affordable, bespoke learning experiences.

"Spark makes it so easy to manipulate our LMS to the way we want it to be and gives us so much more flexibility going forward. The feedback from everyone who has engaged with the site so far has been very positive." **Deirdre Cashin | Gas Networks Ireland**

Budget-boosting bespoke The level of detail and customisation that's baked into Spark gives you the design and features you need at the right price. It makes a bespoke learning platform affordable within any budget.

Incredibly configurable If we started listing the things you can configure with Spark, it would sound complicated. And nothing could be further from the truth. It's actually a fantastically uncomplicated way to achieve the precise outcomes you want from your learning platform.

Exceptional user experience Treat your learners to the highest standards of UX. With clean, intuitive design that's customised to your requirements, you'll create an engaging learning platform that keeps your users coming back for more.

Made for you

It goes beyond customisation and configuration. You're involved in an ongoing dialogue with our experienced consultancy, quality assurance and UX teams to ensure Spark continues to help you reach your goals.

Flexible functionality Spark's powerful core app is tailored to create the learning experiences you want to deliver. You get complete control over the features, with the additional flexibility to choose from a suite of customisable add-on functionality.

Satisfyingly simple to use Whether you're a seasoned designer or starting from scratch, Spark's visual builder enables you to customise every aspect of your learning platform to create something beautiful. An easy-touse interface takes the hassle out of creating learning.

Stress-free upgrades

Unlike bespoke LMS themes, which require some unpicking and reworking before each upgrade, Spark is continually improved to embrace the latest technologies and support new versions. That makes upgrading to access new features far more efficient.

START THAT DIALOGUE RIGHT NOW.

WHICH SPARK ADD-ONS WILL YOU CHOOSE?

All Spark installations on Totara Learn, Moodle LMS or Moodle Workplace come with your choice of six premium add-ons. You can opt for more as add-ons. **Select from:**

Activity Bookmarks

Save useful or interesting activities to the dashboard with a single click.

Branded Emails

Send professional, cohesive and on-brand emails from your learning platform.

Course Catalogue

Display your courses in a simple, more informative way – and with greater admin control.

Course Section Completion

Show learners a detailed overview of their progress on their most recently accessed course.

FAQs

Keep learners informed by displaying frequently asked questions in a course or dashboard.

Featured Courses

Promote popular, important or under-used courses using this carousel feature.

Featured Topics

Showcase the most recent discussion topics from key forum activities.

Featured Video

Showcase important video content to learners to enhance learning or provide context.

Last Course Accessed

Add to the dashboard so learners can instantly resume learning where they left off.

Latest News

Create a beautiful blog on your LMS to keep learners in the loop.

Logos

Display the logos of partners, sponsors, thirdparty organisations or related sites.

WORKPLACE

Marketing Cards

Promote key information around your LMS with custom visuals, content and calls-to-action.

WORKPLACE

Marketing Grid

Display key promotional content in an attractive grid layout.

Marketing Sections

Transform your LMS into a website-like experience with attractive pages that align with your brand.

Multi-Login

Streamline and simplify how people access your LMS if you have multiple login options.
